

CULTURED MARBLE CARE & WARRANTY

To clean your cultured marble, cultured onyx or cultured granite products, use a soft sponge or cloth along with a mild soap and water or use a non-abrasive aerosol foam cleaner. DO NOT use abrasive cleaners such as Ajax or Comet, as they may damage the finish.

To remove soap build-up, we recommend using a mild solution of vinegar and water.

To make cleaning easier and to maintain luster of gloss finishes, applications of paste wax or products like *Gel/Gloss™* should be applied periodically.

Automotive polishing compound or baking soda will remove simple stains and scratches.

Avoid running extremely hot water in your sinks, as the thermal shock can cause small cracks to appear in your sink bowl; this is also known as "crazing". It is recommended that you keep your water heater below 125 degrees to prevent damage and more importantly, for safety reasons. Not doing so can void your products warranty.

If you install your own marble top or hire your own plumber, make sure that they know to not over-tighten the drain and use 100% silicone to install the drain and not other types of sealers.

The above information is a compilation from several manufacturers & given as a general guideline. For more detailed information, please refer to the brand manufacturer's website for your specific product.

WARRANTY: Village Floor & Wall, Inc. warrants workmanship for 1 year from the date of installation. Materials are warranted to the same extent and for as long as the manufacturers warrant such. Inspect your job thoroughly immediately following installation, to see if everything is completed as agreed. Warranty items that are covered by your contractor should be reported to them, they in turn will contact us. The following are excluded from the terms of this warranty: loss or damage from normal wear and tear, humidity level changes, negligence or improper maintenance. Loss or damage which the homeowner has not taken timely action to minimize is also excluded.
